

CHURCH VISUAL PAGING

Microframe's Visual Paging systems are some of the most versatile church solutions on the market. We've designed these displays to provide your church family with a discreet option to be notified if they need to attend to their child in a separate area in the church. This allows for less distractions in your sanctuary, and more focus on your Pastor's message.

WI-FI PRICING: \$229 - \$449

WI-FI VISUAL PAGING

Equip your Children's Department with instant access to assistance when they need it. The free app allows for multiple volunteers to access the display in the same timeframe. Simply enter a child's unique ID number into the app, and it will instantly appear on the display, which is typically in the main sanctuary where it is easily in view for the parents.

WIRELESS VISUAL PAGING

Wireless Visual Paging allows for your display and the wireless transmitter to be further away from each other and remain connected. This system has been tested up to a half-mile distance. Enter the desired number on the transmitter and instantly update the display.

WIRELESS PRICING: \$748 - \$848

WIRED VISUAL PAGING

The Wired Visual Paging system is a tried and true favorite that has withstood the test of time. Easily control the display using the handheld wired keypad. Some of our customers are still using their wired visual paging systems that were purchased in the mid-90's! This set up is sure to provide trusted reliability for years to come.

WIRED PRICING: \$468 - \$538
